

**PARTNERS IN RESOURCE MANAGEMENT
AND SUSTAINABLE DEVELOPMENT**

**FORESTRY, ARCHEOLOGICAL
AND ENVIRONMENTAL SERVICES**

YUCWMENLÚCWU (CARETAKERS OF THE LAND) LLP

WHO WE ARE

Yucwmenlúcwu (Caretakers of the Land) is a natural and cultural resource management company that provides a completed range of environmental, archaeological, and forestry services. We are based in the North Okanagan, but our expertise and trusted service brings us to project sites throughout the Interior of BC.

With a highly skilled team of professionals and certified technicians, as well as a number of industry-leading firms as partners, we manage and deliver government, industry and private sector projects from concept to completion with the highest level of standards at every stage. We see ourselves as partners in resource management and sustainable development with our many partners and clients.

OUR APPROACH

YUCWMENLÚCWU means 'Caretakers of the Land,' and that's the foundation of our approach. With our people's culture and connection to the land guiding us, we balance conservation and economic development through innovative and practical solutions. We are committed to working with our partners and clients in the early stages of projects to ensure an adaptive approach.

INNOVATIVE
AND PRACTICAL
SOLUTIONS
FOR RESOURCE
MANAGEMENT
AND SUSTAINABLE
DEVELOPMENT

OUR ADVANTAGE

- Full suite of environmental, archaeological, and forestry services.
- Trusted team of professionals with a reputation for excellence and collaboration.
- Industry-leading partners to assist with large-scale projects and capacity development.
- Capabilities for projects of all size and scope throughout Interior BC.

SERVICES

ENVIRONMENTAL PLANNING & MANAGEMENT

Our environmental planning and management team have a comprehensive understanding of environmental regulations and regulatory processes, and we'll lead you through these critical steps to ensure your project is on track.

- Environmental impact assessments
- Environmental research and studies
- Environmental management plans
- Regulatory permitting
- Environmental monitoring

FISHERIES & AQUATIC ECOLOGY

Fishery resources have been managed by the Splat-sin people since time immemorial. Our fisheries team takes great pride in conserving and protecting these important resources through an ecosystem-based approach.

- Fisheries inventory and population assessments
- Fish and riparian habitat assessments
- Aquatic resource management plans
- Fish and riparian habitat restoration, planning and design
- Fish salvage and relocation

WATER QUALITY & QUANTITY

Water has always been an essential source of life as well as an important passageway for the Splat-sin people. With our deep respect for this resource in mind, we focus on preserving water quality and quantity.

- Water quality and quantity monitoring programs
- Water quality sampling and analysis
- Hydrometric monitoring and analysis
- Water quality restoration and planning
- Sediment monitoring and analysis

WILDLIFE & TERRESTRIAL ECOLOGY

Guided by Splatsin's values, our wildlife team considers the temporal and spatial aspects of each project, including the past, present, and future impacts, to ensure wildlife and critical habitats are protected for future generations.

- Species inventory and population assessments
- Species-at-risk surveys and habitat assessments
- Ecosystem description and classification
- Terrestrial habitat restoration, planning and design
- Species salvage and relocation

ARCHAEOLOGY

Our approach to archaeological assessments involves consideration of the cultural and environmental setting to facilitate a broader understanding of our cultural heritage.

- Archaeological impact assessments
- Archaeological overview assessments
- Preliminary field reconnaissance
- Archaeological excavation
- Archaeological archival and background research

FORESTRY

As leaders in timber supply planning and forestry operations, we identify opportunities to plan and harvest our renewable timber resources in a way that's safe, sustainable, and profitable.

- Turn-key license management
- Total resource planning and development
- Log marketing and logging supervision
- Surveys, administration, treatments, and planting
- ArcView GIS mapping

“The Creator, in giving the land to the people, required the people to look after the land, the animals, the plants, the water and the air.

The Splatshin people are inseparable from the land. It is this deep sense of responsibility that engenders the heartfelt need to be stewards of the land and resources of Secwepemc’ulucw.

We will balance conservation and utilization of our resources in a sustainable manner for current and future generations.”
